To Park Management

(UPDATE 0002)

WHY NOT?

Come to our State Parks, why not?

If some campers are first come, first served, they can't use sites on the weekends. These sites may have been reserved by others, months ago. We need a 50% electric / water sites for reserved and 50% electric /water sites for first come first served.

Fees are increased for everyone. Some have a tiny Teardrop camper, or a very tiny camper like mine. Greyhound bus size RV or fifth wheel campers have large airspace to heat or cool. I don't, but I'll also be paying an amount equal to the very large utility RV prices.

I am a resident of Albuquerque, New Mexico. Some campers are residents of **New Mexico State Parks**. Your hired reservation system could possibly tell who is doing the state park residence.

The last day of September is the last day of my annual pass. My camper gets raised off its tires. This is normal for the upcoming winter. Will it be lowered on the first of March next year, or will it stay lifted for years, or forever?

I hope you received my previous letters.

Raymond Giroux
